

Diagrams and maps contain information that you have to "read" - just like words!

Diagrams and Maps

- 1 Look at a chapter of the book with a diagram or map, and look closely to "read" what it is telling you.
- 2 Write down the information the diagram/map shows.
- 3 How does the information in the diagram/map link to what you are reading?
- 4 Why do you think the author included the diagram/map instead of text?

Diagrams/maps can help you to visualize or understand a lot of information very quickly.

My notes

A large, empty rounded rectangular box for taking notes, connected to the "My notes" thought bubble by a line.
