PATHWAYS

Killer Plants

Fiction

Imagine that you are deep in a jungle and find a new killer plant. What does it look like? How does it catch food? Write a story about finding the plant, using lots of describing words (adjectives).

Killer Plants

Informational

Write a step-by-step summary of how the bladderwort catches and digests its prey.

Killer Plants

Letter writing

Imagine that a swamp near you has lots of Venus flytraps and sundews in it – but it is going to be filled in to build a mall. Write a letter to the newspaper about why this should happen or not.

Killer Plants

Opinion

Do you think strangler figs should be stopped from killing other trees? Why or why not? Remember to use evidence from the text, and add a conclusion.

PATHWAYS

Killer Plants

Research

The pitcher plant and tree shrew help each other survive. Find out about another pair of plants and animals that work together to survive. Take notes, and write a summary about what you find out.
