

Pacing

Read a chapter of the book out loud as **FAST** as you can.

1

Did you trip up on some parts? How well you understand what you read?

Now, read the same part out loud, but as **SLOW** as you can.

2

How was it tricky to understand? What was hard about reading slow?

3

This time, try to read the same part out loud but at a comfortable, medium speed.

4

Which was the easiest speed to read at, and why do you think this?

If someone was listening to you read, which speed do you think they would understand best?

"Try not to speed up for the easy parts, or you might have to stop when something gets tricky. Keep it steady!"

My notes

A large, rounded rectangular box for taking notes, connected to the 'My notes' label by a line.
