

Using Evidence

- 1 Read a chapter of the book. Find types of evidence the author has used to support the text. Are they images? Facts? Other types?
- 2 Write down how the types of evidence support what that author is saying in the text.
Are there any parts that you think might need more evidence?
- 3 What would it be like if the author didn't include any evidence? Would the text be as easy to understand?
- 4 Brainstorm types of evidence that you can include in your own writing. What are some reliable places to find evidence?

"Evidence should come from a reliable source - like a printed book, or responsible website!"
